SUBJECT INDEX

Absorption, 279
Alternative blowing agent, 206
Amine catalyst, 580
Analytical technique, 163
Antioxidant, 560
Appliance foam, 192, 240
Aromatic isocyanates, 459
ASTM D-5155, 459
Bead fusion, 484
Block foam, 240
Blowing agents, 163, 240
  alternative blowing agent, 206
Blowing efficiency enhancer, 540
Catalyst,
  blowing, 580
  gelation, 580
Cell, 176, 295
Cellular fracture, 484
Cellular solids, 527
Chlorofluorocarbon (CFC), 163
  alternatives, 252
  elimination, 206, 252, 279
  non-CFC, 265
  reduction, 206, 265, 337
  HCFC, 192
Compression, 354, 392
  local rolling, 392
Compressive load, 378
Cup foam, 432
Cushioning, 527
Cyclical loads, 378
Discoloration, 560
Dynamic mechanical analysis, 135
Energy absorption, 506
Extended IFD range, 206
Finite-element analysis, 116
Flexible foam, 279, 337
Flexible slabstock, 337
Foam, 265, 354, 378, 392
  appliance, 192, 240
  block, 240
  cup, 432
  flexible, 337, 432, 560
  gasified, 295
  high resilience, 135
  laminate, 240
  liquid-filled, 354, 378, 392
  low density, 378
  MDI-based PU foams, 540
  mechanical characteristics of, 295
  open-celled, 354, 378, 392
  phenolic, 163
  polyimide, 135
  polyurethane, 135, 192, 240, 265, 337, 432, 560, 580
  polyisocyanurate, 240
  polystyrene, 484, 506
  rigid, 240, 432
  semi-flexible, 135, 432
  solid, 527
  structural, 295
  viscoelastic, 135
  water blown, 252, 265, 279
Foam cell gas analysis, 163
Foam morphology, 135, 206, 337
Foamed plastics, 295
Fracture toughness, 484, 506
Gas chromatography, 163
Gas mixture, 240
Gasified foam, 295
HCFC, 192
High resilience foams, 135
Interbead fracture, 484
Isocyanate index, 540
Isocyanates, aromatic, 459
Laminate foam, 240
Liquid transfer rates, 378
Liquid-filled foam, 354, 378, 392
Localized rolling compression, 392
Low index processing, 206
Low-density foam, 378
MDI-based PU foams, 540
Mean temperature, 240

(continued)

Subject Index (continued)
Mechanical characteristics of foams, 295
Methyl chloroform, 206
Methylene diphenyldiisocyanate, 192
Moldfilling, 116
Morphology, foam, 206
NCO content, 459
Non-chlorofluorocarbon, 252, 265
Organic pendants, 176
Open-celled foam, 252, 354, 378, 392
Performance test, 432
Permeability, 378
Phenolic foam, 163
Polyimide foams, 135
Polyisocyanurate foam, 240
Polyol technologies, 206
Polystyrene foam, 484, 506
Polyurea, 337
Polyurethane foam, 135, 192, 240, 267, 337, 580
Prototype tooling, 116
Radiative thermal conductivity, 240
Reduced chlorofluorocarbon (CFC), 265
Retention Pad, 354
Rigid foam, 192, 240, 265
RIM design, 116
Rise rate, 432
Selective catalyst, 337
Semi-flexible foams, 135
Silicone backbone, 176
Softening additive, 337
Solid foam, 527
Solid thermal conductivity, 240
Sound absorption, 135
SPI/ISOPA Polyurethanes World Congress 1991, 13
Structural foam, 295
Surfactants, 265
Temperature profiles, 560
Thermal aging, 163
Thermal conductivity, 580
Thermal foaming, 295
Toluene Diisocyanate (TDI), 192
Ultrasonic, 432
URATE, 432
Viscoelastic foams, 135
Water blown, 252, 265, 279
Water Co-blown, 265
